Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) OR THIRTY (30) DAYS, WHICHEVER IS LONGER, FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

A substitute specification in proper idiomatic English and in compliance with 37 CFR 1.52(a) and (b) is required. The substitute specification filed must be accompanied by a statement that it contains no new matter.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1- 10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

The claims are generally narrative and indefinite, failing to conform with current U.S. practice. They appear to be a literal translation into English from a foreign document and are replete with grammatical and idiomatic errors.

The prior art will be applied as best understood.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1-10 are rejected under 35 U.S.C. 102(b) as being anticipated by Grunfeld

Grunfeld discloses a lower frame (fig. 1) installed with a running belt (fig. 1) being rotated by motor 25; a support frame (fig. 1) installed into the one side of the lower frame; a handle 35 attached to the support frame; and a scale plate 25 being characterized in that the running belt is reciprocately moved in a predetermined scope; the scale plate 4 indicates is indicated with a reciprocating times, a reciprocating distance and a reciprocating speed (col. 6, lines 66 – et seq.), both edges of the lower frame and both edges of the running belt are formed with a recognition table (col. 2, lines 29-32), the forwarding and reversing rotations of the running belt are controlled by a motor driver to thereby allow the running belt to be reciprocately moved at a predetermined reciprocating length, reciprocating times and reciprocating speed 25, method according to claim 5, wherein a reciprocating times, a reciprocating distance and a reciprocating speed of the running belt 5 are used directly by user or used selectively by the user using a program being set in advance with various combinations (col. 2, lines 11 - et seq.), the speed of a forwarding direction and the speed of a reversing direction during the reciprocating movement of the running belt are controlled differently from each other (col. 2, lines 29 – et seq).

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Martin et al disclose a reversible treadmill.
